

ALI HASSAN

Fullstack Developer

(+20)100 062 7666 — alghost2004@gmail.com — linkedin.com/in/ali-hegazy
github.com/khemul — my-portfolio.vercel.app — Alexandria, Egypt

Summary

Fullstack Developer building end-to-end web applications with **React/Next.js** on the frontend and **Node.js/Express** on the backend using TypeScript. Experienced in **RESTful APIs**, **WebSockets**, **PostgreSQL/MongoDB**, and cloud tools like **AWS S3 and Docker**. Focused on clean architecture, secure auth (**JWT**, **OAuth2**), and reliable validation (**Zod**, **Yup**).

Education

Egyptian E-Learning University

Bachelor of Computer Science

Sep. 2022 – May 2026

Alexandria, Egypt

Certifications & Courses

Advanced Node.js: Node.js Internals, Redis, AWS S3, CI/CD

Udemy — Instructor: Stephen Grider

2025

Node.js: REST & GraphQL APIs, Cloud Deployment

Udemy — Instructors: Andrei Neagoie, Adam Odziemkowski

2025

NestJS: The Complete Developer's Guide

Udemy — Instructor: Stephen Grider

2026

Experience

Prime Academy | *React.js, Node.js*

Fullstack Developer

Feb 2025 – Present

Freelance

- Built a modern E-learning platform serving **500+ students** with video playback, interactive quizzes, real-time chat, and an admin dashboard.
- Optimized API response times from **2s down to 500ms** through query optimization and efficient middleware design.
- Optimized Vite build configuration, **reducing chunk size by 50%** to improve load performance and production bundle efficiency.
- Handled file uploads via **Cloudflare R2** with uppy uploader.
- Implemented secure JWT authentication and role-based access control.
- Used Drizzle ORM with MySQL to model and manage relational data efficiently.
- Set up Docker and Nginx to streamline development, testing, and deployment workflows.

CloudKode Mentor | *Next.js, Express, TypeScript*

Fullstack Developer

Nov 2025 – Apr 2026

Freelance

- Built a two-sided mentorship platform supporting 1-on-1 and group sessions with Google Meet integration.
- Eliminated double-booking race conditions using Redis-based distributed locks across booking endpoints.
- Integrated LinkedIn SSO and People API to streamline onboarding by auto-populating user profile data.
- Automated mentor badge generation using Puppeteer and recorded session attendance via Google Reports API.
- Handled file storage with AWS S3, schema validation with Zod, and product analytics via PostHog.
- Built moderation features including user banning, appeal submissions, mentor reporting, and session ratings.

Syntax Error | *Next.js*

Fullstack Developer

Oct 2024 – Jan 2025

Freelance

- Built a course platform with dynamic quizzes, admin tools, and secure subscriptions using Next.js (TypeScript).
- Used Prisma + PostgreSQL for optimized queries and robust schema design.
- Secured sessions via JWT + HTTP-only cookies; validated inputs with Zod.
- Integrated Imgur for image uploads and offloaded tasks to Cloudflare Workers.

Projects

Health Bridge | Graduation Project | *Node.js, Express.js, PostgreSQL, TypeScript, Redis, AWS S3*

- Built a full-stack doctor-client booking platform with AI chatbot, supporting bilingual (Arabic & English) interfaces and role-based access control.
- Engineered a custom scheduling system with recurring weekly slots, date-specific availability, rolling booking windows, and minimum notice hour enforcement.
- Integrated Google Workspace APIs (Meet, Calendar) to auto-generate video session links and send synchronized email confirmations upon booking.
- Resolved double-booking race conditions using Redis distributed locking with atomic SET NX EX, ownership tracking, exponential backoff, and heartbeat renewal.
- Optimized booking response times from 2–3s to under 500ms by splitting transactions: critical booking logic is awaited while Google Meet creation and notifications run asynchronously with cron-based retry fallback.
- Implemented real-time AI chatbot streaming via SSE with per-connection identity tracking and unique stream IDs, eliminating multi-user session conflicts.
- Offloaded patient prescription uploads to AWS S3 to prevent server I/O bottlenecks and maintain API responsiveness under concurrent load.

Omni Store | *React.js, Express, MongoDB, TypeScript*

- Built a full-featured e-commerce platform with authentication, cart, wishlist, and product management.
- Developed RESTful APIs using Express; secured user sessions with JWT and HTTP-only cookies.
- Optimized backend performance using MongoDB indexing and efficient query design.
- Designed a responsive UI with Tailwind CSS, Headless UI, and React Router.

Blogy | *Next.js, PostgreSQL, Redis*

- Developed a Markdown-powered blogging platform with live preview and chunked image uploads via FilePond.
- Integrated JWT-based authentication, role-based authorization, and Zod validation.
- Employed Redis for request rate limiting to mitigate abuse.
- Wrote unit and integration tests using Jest and automated CI/CD via GitHub Actions.

Soft Skills

Communication

Team Collaboration

Time Management

Problem Solving

Adaptability

Critical Thinking

Self-motivation

Integrity

Technical Skills

Languages: JavaScript, TypeScript

Frontend Technologies: React.js, Next.js, Tailwind CSS, ShadCN, Redux, Zustand, React Query

Backend Technologies: Node.js, Express.js, Next.js (API Routes), WebSockets, Server-Sent Events (SSE), GraphQL, Redis

ORMs & Databases: Prisma, Sequelize, Drizzle, TypeORM, PostgreSQL, MongoDB, MySQL, SQLite

Authentication & Security: JWT, OAuth2, HTTP-only cookies, Zod, Yup

Testing & Automation: Jest, Puppeteer

Developer Tools: VS Code, Git, Postman, Bun, Cloudflare Workers, Docker, PM2

Cloud & Deployment: Vercel, AWS (S3), Nginx

Languages

Arabic: Native

English: fluent
